BRONX, N. Y. 10461

DEPARTMENT OF GENETICS

September 6, 1978

Dear Joshua,

ever since I heard of your appointment as President of Rockefeller U. I wanted to write and congratulate you. Now I received the invitation to your inauguration which I no doubt owe to your thoughtfulness, and I look forward to being there. A lot of time has passed since the days at Schermerhorn, the years with mice on the 8th and yeast + other fungi on the 10th floor, and some of the most important people of that time are no longer around. More recently, I enjoyed many of your comments here & there, not the least that on mice and embryology some 12 years ago. It will be good to see you on October 16th. ✓

With my very best wishes for success on every level at the Rockefeller who showed such excellent judgment in their choice of you as President,

yours,

Salome Waechter

B. Kardosin
